

ENGINEERS SHAPE THE WORLD!

8 Week STEM Lunchtime Program
allows kids to step into the shoes of an engineer!

Location: **Annette St./High Park School**
Day & Time: **Tuesdays, 11:45 – 12:45**
Dates: **April 12 – May 31, 2016**
Grades: **1 – 6**
Cost Per Student: **\$115 + HST**

Register online today!

BUILD

LEARN

TAKE HOME

AEROSPACE

Launch your imagination to new heights as you explore **aerospace engineering**! Discover the secrets of working in space – efficiency and compact design. Create a trussed space station module, then connect it with others to create a massive modular spacecraft.

TOWERS

Reach for the sky! Find out how **structural engineers** use ideas from physics to solve problems. Work together to build a structurally sound tower with a working elevator, then test and improve your design for strength and stability.

CARNIVALS

Feel the thrill as you build a spinning swing ride! Learn about the forces and **mechanical engineering** concepts behind some of your favorite amusement park rides. Then improve and test the design to create an even wilder ride.

BOATS

Create a sea-worthy vessel as you set sail with **nautical engineering**! Build and test a boat powered by potential and kinetic energy. Then try changing specific variables to improve speed, buoyancy, and stability.

CREATURES

Discover nature's engineering secrets as we investigate **biomimicry**! We can learn a lot about efficient design from observing plants and animals. Build a walking insect machine then test different ways to help it climb up the steepest branch.

BRIDGES

How can you build the strongest bridge? Work together with your fellow **civil engineers** to build and test different bridge designs. Then use what you've learned to create the strongest bridge possible.

VEHICLES

Get in gear as an **automotive engineer**! Build a motorized vehicle and learn how to optimize it. Use wheels, axles and gears to reduce friction and make it work better. Then shift things into a higher gear to get a hands-on understanding of transmissions and gear ratios.

MACHINES

Engineering is creative! Learn how gears, levers, and pulleys are useful tools for **mechanical engineers** then combine them with art and design to create and test a motorized drawing machine.

Register online: www.toronto.madscience.org

Registration is first-come, first-served. Register early to secure your spot!

All registrations must be completed through Mad Science. Registrations will not be accepted at the school.
